Permission to make digital or hard copies of portions of this work for personal or classroom use is granted without fee provided that copies are not made or distributed for profit or commercial advantage and that copies bear this notice and the full citation on the first page. Copyright for components of this work owned by others than ACM must be honored. Abstracting with credit is permitted. To copy otherwise, to republish, to post on servers or to redistribute to lists, requires prior specific permission and/or a fee. Request permission to republish from: Publications Dept., ACM, Inc. Fax +1 (212) 869-0481 or permissions@acm.org.

For other copying of articles that carry a code at the bottom of the first or last page, copying is permitted provided that the per-copy fee indicated in the code is paid through the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923.

Notice to Past Authors of ACM-Published Articles

ACM intends to create a complete electronic archive of all articles and/or other material previously published by ACM. If you have written a work that has been previously published by ACM in any journal or conference proceedings prior to 1978, or any SIG Newsletter at any time, and you do NOT want this work to appear in the ACM Digital Library, please inform permissions@acm.org, stating the title of the work, the author(s), and where and when published.

Additional copies may be ordered prepaid from:

Navigation

1 Faster Documentation Navigation with Space-Filling Thumbnails

A. Cockburn, *University of Canterbury*
C. Gutwin, *University of Saskatchewan*
J. Alexander, *University of Canterbury*

11 An Evaluation of Pan&Zoom and Rubber Sheet Navigation with and without an Overview

D. Nekrasovski, A. Bodnar, J. McGrenere, *University of British Columbia*
F. Guimbretière, *University of Maryland*
T. Munzner, *University of British Columbia*

21 OrthoZoom Scroller: 1D Multi-Scale Navigation

C. Appert, *LRI/INRIA Futurs*
J.-D. Fekete, *INRIA Futurs/LRI*

Mobile Surfing and Effects of Wearables

31 Time Based Patterns in Mobile-Internet Surfing

M. Halvey, M. T. Keane, B. Smyth, *University College Dublin*

35 Minimap - A Web Page Visualization Method for Mobile Phones

V. Roto, A. Popescu, *Nokia Research Center*
A. Koivisto, *Nokia Technology Platforms*
E. Vartiainen, *Nokia Research Center*

45 An Examination of the Effects of a Wearable Display on Informal Face-to-Face Communication

G. McAtamney, *Yell Group*
C. Parker, *Glasgow Caledonian University*

Games

55 Peekaboom: A Game for Locating Objects in Images

L. von Ahn, R. Liu, M. Blum, *Carnegie Mellon University*

65 Representation of Interwoven Surfaces in 2 1/2D Drawing

K. B. Wiley, L. R. Williams, *University of New Mexico*

75 Verbosity: A Game for Collecting Common-Sense Facts

 L. von Ahn, M. Kedia, M. Blum,
Carnegie Mellon University

79 Improving Accessibility of the Web with a Computer Game

 L. von Ahn, S. Ginosar, M. Kedia, R. Liu,
M. Blum, *Carnegie Mellon University*

Privacy 1

83 Evaluating Interfaces for Privacy Policy Rule Authoring

 C.-M. Karat, J. Karat, C. Brodie,
IBM T.J. Watson Research Center
J. Feng, *Towson University*

93 Putting People in Their Place; An Anonymous and Privacy-Sensitive Approach to Collecting Sensed Data in Location-Based Applications

K. P. Tang, P. Keyani, J. Fogarty, J. I. Hong, *Carnegie Mellon University*

103 Advancing Ambiguity

K. Boehner, J. T. Hancock, *Cornell University*

107 Girls, Technology and Privacy: "Is My Mother Listening?"

W. March, *Intel Research*
C. Fleuriot, *featherhouse*

Social Computing 1

111 Dogear: Social Bookmarking in the Enterprise

D. R. Millen, J. Feinberg, B. Kerr, *IBM*

121 Increasing User Decision Accuracy using Suggestions

P. Pu, P. Viappiani, B. Faltings, *Ecole Polytechnique Fédérale de Lausanne*

131 Co-Authoring with Structured Annotations

Q. Zheng, K. Booth, J. McGrenere,
University of British Columbia

Participatory Design

141 "LINC-ing" the Family: The Participatory Design of an Inkable Family Calendar

 C. Neustaedter, *University of Calgary*
A. J. B. Brush, *Microsoft Research*

151 Participatory Design with Proxies: Developing a Desktop-PDA System to Support People with Aphasia

J. Boyd-Graber, S. Nikolova, *Princeton University*
K. Moffatt, *University of British Columbia*
K. Kin, J. Lee, L. Mackey, *Princeton University*
M. Tremaine, *Rutgers University*
M. Klawe, *Princeton University*

161 Participatory Design in Emergency Medical Service: Designing for Future Practice

M. Kristensen, M. Kyng, L. Palen, *University of Aarhus*

Interaction Techniques: Haptic and Gestural**171 A Role for Haptics in Mobile Interaction: Initial Design Using a Handheld Tactile Display Prototype**J. Luk, *University of British Columbia*J. Pasquero, *McGill University*S. Little, K. MacLean, *University of British Columbia*V. Lévesque, V. Hayward, *McGill University***181 The Springboard: Multiple Modes in One Spring-loaded Control**K. Hinckley, *Microsoft Research*F. Guimbretiere, *University of Maryland*P. Baudisch, R. Sarin, M. Agrawala, E. Cutrell, *Microsoft Research***191 The GlobeFish and the GlobeMouse: Two New Six Degree of Freedom Input Devices for Graphics Applications**B. Froehlich, J. Hochstrate, V. Skuk, A. Huckauf, *Bauhaus-Universität Weimar***Activity: Design Implications****201 Making Action Visible in Time-Critical Work**J. Landgren, *Viktoria Institute***211 Support for Activity-Based Computing in a Personal Computing Operating System**J. E. Bardram, J. Bunde-Pedersen, M. Soegaard, *University of Aarhus***221 Share and Share Alike: Exploring the User Interface Affordances of File Sharing**S. Voida, W. K. Edwards, *Georgia Institute of Technology*M. W. Newman, *Palo Alto Research Center*
R. E. Grinter, *Georgia Institute of Technology*
N. Ducheneaut, *Palo Alto Research Center***End User Programming****231 Tinkering and Gender in End-User Programmers' Debugging**L. Beckwith, C. Kissinger, M. Burnett, *Oregon State University*S. Wiedenbeck, *Drexel University*J. Lawrence, *Oregon State University*A. Blackwell, *University of Cambridge*C. Cook, *Oregon State University***241 An Evaluation of Using Programming by Demonstration and Guided Walkthrough Techniques for Authoring and Utilizing Documentation**M. Prabaker, *Carnegie Mellon University*
L. Bergman, V. Castelli, *IBM T.J. Watson Research Center***251 Providing Support for Adaptive Scripting on an On-Line Collaborative Learning Environment**G. Gweon, C. P. Rosé, R. Carey, Z. S. Zaiss, *Carnegie Mellon University***Personal Information Management****261 Fast, Flexible Filtering with Phlat- Personal Search and Organization Made Easy**E. Cutrell, D. C. Robbins, S. T. Dumais, R. Sarin, *Microsoft Research***271 The Project Fragmentation Problem in Personal Information Management**O. Bergman, *Tel Aviv University*R. Beyth-Marom, *The Open University of Israel*R. Nachmias, *Tel Aviv University***275 To Have and to Hold: Exploring the Personal Archive**

J. Kaye, J. Vertesi, S. Avery, A. Dafoe,

S. David, L. Onaga, *Cornell University*I. Rosero, *Amazon.com*T. Pinch, *Cornell University***285 Peripheral Display of Digital Handwritten Notes**G. Hsieh, *Carnegie Mellon University*K. R. Wood, A. Sellen, *Microsoft Research Ltd.***Multidisplay Environments****289 Perspective Cursor: Perspective-Based Interaction for Multi-Display Environments**M. A. Nacenta, S. Sallam, B. Champoux, S. Subramanian, C. Gutwin, *University of Saskatchewan***299 Improving Selection of Off-Screen Targets with Hopping**P. Irani, *University of Manitoba*C. Gutwin, *University of Saskatchewan*X. D. Yang, *University of Alberta***309 Effects of Display Position and Control Space Orientation on User Preference and Performance**D. Wigdor, *Mitsubishi Electric Research Labs & University of Toronto*C. Shen, C. Forlines, *Mitsubishi Electric Research Labs*R. Balakrishnan, *University of Toronto***Managing Voice Input****319 The Benefits of Augmenting Telephone Voice Menu Navigation with Visual Browsing and Search**M. Yin, S. Zhai, *IBM Almaden Research Center***329 Time is of the Essence: An Evaluation of Temporal Compression Algorithms**S. Tucker, S. Whittaker, *University of Sheffield***339 Error Correction of Voicemail Transcripts in SCANMail**M. Burke, *Carnegie Mellon University*B. Amento, P. Isenhour, *AT&T Labs-Research*

Interaction Methods

- 349 symSpline: Symmetric Two-Handed Spline Manipulation**
C. Latulipe, S. Mann, C. L. A. Clarke, C. S. Kaplan,
University of Waterloo
- 359 Effects of Feedback, Mobility and Index of Difficulty on Deictic Spatial Audio Target Acquisition in the Horizontal Plane**
G. N. Marentakis, S. A. Brewster, *University of Glasgow*
- 369 Prototyping Retractable String-Based Interaction Techniques for Dual-Display Mobile Devices**
G. Blaskó, *Columbia University*
C. Narayanaswami, *IBM T.J. Watson Research Center*
S. Feiner, *Columbia University*
- 373 Enhancing Human-Machine Interactions: Virtual Interface Alteration through Wearable Computers**
A. Plouznikoff, N. Plouznikoff, J.-M. Robert,
M. Desmarais, *École Polytechnique de Montréal*

Understanding Programs and Interfaces

- 377 Evaluating a Fisheye View of Source Code**
M. R. Jakobsen, K. Hornbæk, *University of Copenhagen*
- 387 Barista: An Implementation Framework for Enabling New Tools, Interaction Techniques and Views in Code Editors**
A. J. Ko, B. A. Myers, *Carnegie Mellon University*
- 397 Answering Why and Why Not Questions in User Interfaces**
B. Myers, D. A. Weitzman, A. J. Ko, D. H. Chau,
Carnegie Mellon University

Games and Performances

- 407 "Alone Together?" Exploring the Social Dynamics of Massively Multiplayer Online Games**
N. Ducheneaut, *Palo Alto Research Center*
 N. Yee, *Stanford University*
E. Nickell, R. J. Moore, *Palo Alto Research Center*
- 417 Interweaving Mobile Games with Everyday Life**
M. Bell, M. Chalmers, L. Barkhaus, M. Hall,
S. Sherwood, P. Tennent, B. Brown, *University of Glasgow*
 D. Rowland, *University of Lincoln*
S. Benford, M. Capra, A. Hampshire,
University of Nottingham
- 427 The Frame of the Game: Blurring the Boundary between Fiction and Reality in Mobile Experiences**
S. Bedford, A. Crabtree, S. Reeves, M. Flintham,
A. Drozd, *University of Nottingham*
J. Sheridan, A. Dix, *Lancaster University*

Designing for Tangible Interactions

- 437 Getting a Grip on Tangible Interaction: A Framework on Physical Space and Social Interaction**
E. Hornecker, *University of Sussex*
J. Buur, *University of Southern Denmark*
- 447 Finding Design Qualities in a Tangible Programming Space**
 Y. Fernaeus, J. Tholander, *Stockholm University*
- 457 Design Requirements for Technologies that Encourage Physical Activity**
S. Consolvo, *Intel Research Seattle and University of Washington*
K. Everitt, *University of Washington*
I. Smith, *Intel Research Seattle*
J. A. Landay, *Intel Research Seattle and University of Washington*

Text Input

- 467 An Intuitive Text Input Method for Touch Wheels**
M. Proschowsky, N. Schultz, *Technical University of Denmark*
N. E. Jacobsen, *Nokia Mobile Phones*
- 471 A New Error Metric for Text Entry Method Evaluation**
J. Gong, P. Tarasewich, *Northeastern University*
- 475 Text Entry Using a Dual Joystick Game Controller**
A. D. Wilson, *Microsoft Research*
M. Agrawala, *University of California at Berkeley*
- 479 Trackball Text Entry for People with Motor Impairments**
 J. O. Wobbrock, B. A. Myers, *Carnegie Mellon University*
- 489 Few-Key Text Entry Revisited: Mnemonic Gestures on Four Keys**
J. O. Wobbrock, B. A. Myers, B. Rothrock, *Carnegie Mellon University*

Visualization and Search

- 493 The Effect of Speech Recognition Accuracy Rates on the Usefulness and Usability of Webcast Archives**
C. Munteanu, R. Baecker, G. Penn, *University of Toronto*
 E. Toms, *Dalhousie University*
D. James, *University of Toronto*
- 503 Visual Search and Reading Tasks Using ClearType and Regular Displays: Two Experiments**
A. Dillon, L. Kleinman, G. O. Choi, R. Bias,
University of Texas at Austin

- 513 Using Hybrid Networks for the Analysis of Online Software Development Communities**
 Y. Medynskiy, *Cornell University*
 N. Ducheneaut, *Palo Alto Research Center*
 A. Farahat, *PricewaterhouseCoopers*

- 517 Visualization of Large Hierarchical Data by Circle Packing**
 W. Wang, H. Wang, G. Dai, H. Wang, *Chinese Academy of Sciences*

Design: Creative and Historical Perspectives

- 521 Dispelling Design as the ‘Black Art’ of CHI**
 T. V. Wolf, *IBM T.J. Watson Research Center*
 J. A. Rode, *University of California at Irvine*
 J. Sussman, W. A. Kellogg, *IBM T.J. Watson Research Center*
- 531 Interaction in Creative Tasks: Ideation, Representation and Evaluation in Composition**
 T. Coughlan, P. Johnson, *University of Bath*
- 541 Implications for Design**
 P. Dourish, *University of California at Irvine*

Information Handling

- 551 Mobile Phones and Paper Documents: Evaluating a New Approach for Capturing Microfinance Data in Rural India**
 T. Parikh, P. Javid, *University of Washington*
 K. Sasikumar, *ekgaon technologies*
 K. Ghosh, *Human Factors India*
 K. Toyama, *Microsoft*
- 561 Handling Documents and Discriminating Objects in Hybrid Spaces**
 P. Luff, C. Heath, *King’s College, London*
 H. Kuzuoka, *University of Tsukuba*
 K. Yamazaki, *Saitama University*
 J. Yamashita, *University of Tsukuba*
- 571 ButterflyNet: A Mobile Capture and Access System for Field Biology Research**
 R. B. Yeh, *Stanford University*
 C. Liao, *University of Maryland*
 S. R. Klemmer, *Stanford University*
 F. Guimbretière, *University of Maryland*
 B. Lee, B. Kakaradov, J. Stamberger, A. Paepcke, *Stanford University*

Security

- 581 Why Phishing Works**
 R. Dhamija, *Harvard University*
 J. D. Tygar, M. Hearst, *University of California, Berkeley*
- 591 Secrecy, Flagging, and Paranoia: Adoption Criteria in Encrypted E-Mail**
 S. Gaw, E. W. Felten, P. Fernandez-Kelly, *Princeton University*
- 601 Do Security Toolbars Actually Prevent Phishing Attacks?**
 M. Wu, R. C. Miller, S. L. Garfinkel, *Massachusetts Institute of Technology*

Automatic Generation and Usability

- 611 UNIFORM: Automatically Generating Consistent Remote Control User Interfaces**
 J. Nichols, B. A. Myers, B. Rothrock, *Carnegie Mellon University*
- 621 Generating Automated Predictions of Behavior Strategically Adapted to Specific Performance Objectives**
 K. Eng, *NASA Ames Research Center*
 R. L. Lewis, *University of Michigan*
 I. Tollinger, *NASA Ames Research Center*
 A. Chu, *University of Michigan*
 A. Howes, *University of Manchester*
 A. Vera, *Carnegie Mellon University & NASA Ames Research Center*
- 631 Automated Summative Usability Studies: An Empirical Evaluation**
 R. West, K. R. Lehman, *SAS Institute Inc.*

640 Author Index

643 Keyword Index

Volume 2

- xi Chairs’ Welcome**
 Gary Olson, *University of Michigan*
 Robin Jeffries, *Google*
- xii CHI 2006 Papers & Notes Co-Chair’s Message**
 Rebecca Grinter, *Georgia Institute of Technology*
 Tom Rodden, *University of Nottingham*
 Paul Aoki, *PARC*
 Ed Cutrell, *Microsoft*
- xiv From ACM SIGCHI’s President and Vice President for Conferences**
 Joseph A. Konstan, *SIGCHI President*
 Dennis Wixon, *Microsoft*
- xv About SIGCHI and ACM**
- xvi CHI 2006 Conference Organization**
- xxix CHI 2006 Sponsors**

Media

- 653 Olfoto: Designing a Smell-Based Interaction**
 S. A. Brewster, D. K. McGookin, C. A. Miller, *University of Glasgow*
- 663 The Television Will Be Revolutionized: Effects of PVRs and Filesharing on Television Watching**
 B. Brown, L. Barkhuus, *University of Glasgow*
- 667 Personal vs. Commercial Content: The Similarities Between Consumer Use of Photos and Music**
 F. Bentley, C. Metcalf, G. Harboe, *Motorola Labs*

Ubiquitous Computing

- 677 TAP: Touch-And-Play**
 D. G. Park, J. K. Kim, J. B. Sung, J. H. Hwang,
 C. H. Hyung, S. W. Kang, *Electronics and
 Telecommunications Research Institute*
- 681 Beyond Record and Play - Backpacks: Tangible
 Modulators for Kinetic Behavior**
 H. Raffle, A. Parkes, H. Ishii, J. Lifton, *MIT Media Lab*
- 691 Embedded Phenomena: Supporting Science
 Learning with Classroom-sized Distributed
 Simulations**
 T. Moher, *University of Illinois at Chicago*

Search and Navigation: Mobiles and Audio

- 701 A Large Scale Study of Wireless Search
 Behavior: Google Mobile Search**
 M. Kamvar, *Google Inc. and Columbia University*
 S. Baluja, *Google Inc. and Carnegie Mellon University*
- 711 FaThumb: A Facet-based Interface for Mobile
 Search**
 A. K. Karlson, *University of Maryland*
-  G. Robertson, D. C. Robbins, M. Czerwinski,
 G. Smith, *Microsoft Research*
- 721 Searching in Audio: The Utility of Transcripts,
 Dichotic Presentation, and Time-Compression**
 A. Ranjan, R. Balakrishnan, M. Chignell,
University of Toronto

Using Knowledge to Predict and Manage

- 731 Responsiveness in Instant Messaging:
 Predictive Models Supporting Inter-Personal
 Communication**
 D. Avrahami, S. E. Hudson, *Carnegie Mellon University*
- 741 Leveraging Characteristics of Task
 Structure to Predict the Cost of Interruption**
 S. T. Iqbal, B. P. Bailey, *University of Illinois*
- 751 A Goal-Oriented Web Browser**
 A. Faaborg, H. Lieberman, *MIT Media Laboratory*

Collecting and Editing Photos

- 761 Understanding Photowork**
 D. S. Kirk, *University of Nottingham*
 A. J. Sellen, C. Rother, K. R. Wood, *Microsoft Research
 Cambridge*
- 771 Gaze-Based Interaction for Semi-Automatic
 Photo Cropping**
 A. Santella, *Rutgers University*
 M. Agrawala, *University of California at Berkeley*
 D. DeCarlo, *Rutgers University*
 D. Salesin, *Adobe Systems & University of Washington*
 M. Cohen, *Microsoft Research*
- 781 Tabletop Sharing of Digital Photographs
 for the Elderly**
 T. Apted, J. Kay, *University of Sydney*
 A. Quigley, *University College Dublin*

Visualization 1

- 791 GUESS: A Language and Interface
 for Graph Exploration**
 E. Adar, *University of Washington*
- 801 The Sandbox for Analysis - Concepts
 and Methods**
 W. Wright, D. Schroh, P. Proulx, A. Skaburskis,
 B. Cort, *Oculus Info Inc.*
- 811 Visual Exploration of Multivariate Graphs**
 M. Wattenberg, *IBM Research*

Privacy 2

- 821 Keeping Up Appearances: Understanding the
 Dimensions of Incidental Information Privacy**
 K. Hawkey, K. M. Inkpen, *Dalhousie University*
- 831 Being Watched or Being Special: How I
 Learned to Stop Worrying and Love Being
 Monitored, Surveilled, and Assessed**
 E. A. Robles, A. Sukumaran, K. Rickertsen, C. Nass,
Stanford University

Pen

- 841 Effectiveness of Annotating by Hand
 for non-Alphabetical Languages**
 M. D. Hamzah, S. Tano, M. Iwata, T. Hashiyama,
University of Electro-Communications
- 851 Speech Pen: Predictive Handwriting
 Based on Ambient Multimodal Recognition**
 K. Kurihara, *University of Tokyo*
 M. Goto, J. Ogata, *National Institute of Advanced
 Industrial Science and Technology*
 T. Igarashi, *University of Tokyo*
- 861 Hover Widgets: Using the Tracking State
 to Extend the Capabilities of Pen-Operated
 Devices**
 T. Grossman, *Microsoft Research and University
 of Toronto*
 K. Hinckley, P. Baudisch, *Microsoft Research*
 M. Agrawala, *Microsoft Research and University
 of California at Berkeley*
 R. Balakrishnan, *University of California at Berkeley*

Everyday Use of Mobiles

- 871 Everyday Practices with Mobile Video
 Telephony**
 K. O'Hara, *Hewlett-Packard Labs*
 A. Black, *Alison Black Research and Consulting*
 M. Lipson, *Orange*
- 881 Sashay: Designing for Wonderment**
 E. Paulos, C. Beckmann, *Intel Research*
- 885 urbanhermes: Social Signaling
 with Electronic Fashion**
 C. M. Liu, J. S. Donath, *MIT Media Lab*
- 889 Because I Carry My Cell Phone Anyway:
 Functional Location-Based Reminder
 Applications**
 P. J. Ludford, D. Frankowski, K. Reily, K. Wilms,
 L. Terveen, *University of Minnesota*

Awareness and Presence

- 899 From Awareness to Connectedness: The Design and Deployment of Presence Displays**
 A. K. Dey, *Carnegie Mellon University*
 E. S. De Guzman, *University of Illinois at Urbana-Champaign*
- 909 Negotiating Presence-in-Absence: Contact, Content, and Context**
 S. Howard, *University of Melbourne and Aalborg University*
 J. Kjeldskov, M. B. Skov, K. Garnæs, O. Grünberger, *Aalborg University*
- 913 Using Linguistic Features to Measure Presence in Computer-Mediated Communication**
 A. D. I. Kramer, *University of Oregon*
 L. M. Oh, *DSO National Laboratories*
 S. R. Fussell, *Carnegie Mellon University*
- 917 The Paradox of the Assisted User: Guidance can be Counterproductive**
 C. van Nimwegen, *Utrecht University*
 D. Burgos, *Open University of the Netherlands*
 H. van Oostendorp, H. Schijf, *Utrecht University*

Healthcare

- 927 Investigating Health Management Practices of Individuals with Diabetes**
 L. Mamykina, *Siemens Corporate Research*
 E. D. Mynatt, *Georgia Institute of Technology*
 D. Kaufman, *Columbia University*
- 937 Tensions in Designing Capture Technologies for an Evidence-Based Care Community**
 G. R. Hayes, G. D. Abowd, *Georgia Institute of Technology*
- 947 Pride and Prejudice: Learning How Chronically Ill People Think about Food**
 K. A. Siek, K. H. Connelly, Y. Rogers, *Indiana University*

Online Communities

- 951 Insert Movie Reference Here: A System to Bridge Conversation and Item-Oriented Web Sites**
 S. Drenner, M. Harper, D. Frankowski, J. Riedl, L. Terveen, *University of Minnesota*
- 955 Motivating Participation by Displaying the Value of Contribution**
 A. M. Rashid, *University of Minnesota*
 K. Ling, R. D. Tassone, *Carnegie Mellon University*
 P. Resnick, *University of Michigan*
 R. Kraut, *Carnegie Mellon University*
 J. Riedl, *University of Minnesota*

- 959 Talk to Me: Foundations for Successful Individual-Group Interactions in Online Communities**
 J. Arguello, *Carnegie Mellon University*
 B. Butler, *University of Pittsburgh*
 E. Joyce, *Edinboro University*
 R. Kraut, K. S. Ling, *Carnegie Mellon University*
 X. Wang, *University of Pittsburgh*

- 969 Routine Patterns of Internet Use and Psychological Well-being; Coping with a Residential Move**
 I. Shklovski, R. Kraut, *Carnegie Mellon University*
 J. Cummings, *Duke University*

Visualization 2

- 979 Visualizing Email Content: Portraying Relationships from Conversational Histories**
 F. B. Viégas, *IBM Research*
 S. Golder, *HP Laboratories*
 J. Donath, *MIT Media Lab*
- 989 Clipping Lists and Change Borders: Improving Multitasking Efficiency with Peripheral Information Design**
 T. Matthews, M. Czerwinski, G. Robertson, D. Tan, *Microsoft Research*
- 999 A Fisheye Follow-up: Further Reflections on Focus + Context**
 G. W. Furnas, *University of Michigan*

Novel Methods: Emotions, Gestures, Events

- 1009 Prototyping and Sampling Experience to Evaluate Ubiquitous Computing Privacy in the Real World**
 G. Iachello, *Georgia Institute of Technology*
 K. N. Truong, *University of Toronto*
 G. D. Abowd, G. R. Hayes, *Georgia Institute of Technology*
 M. Stevens, *Logical Design Solutions*
- 1019 Design and Experimental Analysis of Continuous Location Tracking Techniques for Wizard of Oz Testing**
 Y. Li, E. Welbourne, *University of Washington*
 J. A. Landay, *University of Washington & Intel Research Seattle*
- 1023 Measuring Emotional Valence during Interactive Experiences: Boys at Video Game Play**
 R. L. Hazlett, *Johns Hopkins University & Hazlett Research*
- 1027 A Continuous and Objective Evaluation of Emotional Experience with Interactive Play Environments**
 R. L. Mandryk, M. S. Atkins, *Simon Fraser University*
 K. M. Inkpen, *Dalhousie University*

Social Computing 2

- 1037 Using Intelligent Task Routing and Contribution Review to Help Communities Build Artifacts of Lasting Value**
D. Cosley, D. Frankowski, L. Terveen, J. Riedl,
University of Minnesota
- 1047 groupTime: Preference-Based Group Scheduling**
M. Brzozowski, K. Carattini, S. R. Klemmer,
P. Mihelich, J. Hu, A. Y. Ng, *Stanford University*
- 1057 Accounting for Taste: Using Profile Similarity to Improve Recommender Systems**
P. Bonhard, C. Harries, J. McCarthy, M. A. Sasse,
University College London

Menus

- 1067 Improving Menu Interaction: a Comparison of Standard, Force Enhanced and Jumping Menus**
D. Ahlström, R. Alexandrowicz, M. Hitz, *Klagenfurt University*
- 1077 Zone and Polygon Menus: Using Relative Position to Increase the Breadth of Multi-Stroke Marking Menus**
S. Zhao, *University of Toronto*
M. Agrawala, *University of California at Berkeley and Microsoft Research*
K. Hinckley, *Microsoft Research*
- 1087 Measuring the Difficulty of Steering Through Corners**
R. L. Pastel, *Michigan Technology University*

Selecting and Tracking

- 1097 Face Tracking as an Augmented Input in Video Games: Enhancing Presence, Role-playing and Control**
S. Wang, *Microsoft Research Asia*
X. Xiong, *Tsinghua University*
Y. Xu, *Renmin University of China*
C. Wang, *Tsinghua University*
W. Zhang, X. Dai, D. Zhang, *Microsoft Research Asia*
- 1107 Direct Pointer: Direct Manipulation for Large-Display Interaction using Handheld Cameras**
H. Jiang, *Tsinghua University*
E. Ofek, N. Moraveji, *Microsoft Research Asia*
Y. Shi, *Tsinghua University*
- 1111 Interacting with Communication Appliances: An Evaluation of Two Computer Vision-Based Selection Techniques**
J. Eisenstein, *Massachusetts Institute of Technology*
W. E. Mackay, *INRIA Futurs*
- 1115 Attention Funnel: Omnidirectional 3D Cursor for Mobile Augmented Reality Platforms**
F. Biocca, *Michigan State University*
A. Tang, *Michigan State University and University of Central Florida*
C. Owen, F. Xiao, *Michigan State University*

Disabilities

- 1123 Feeling What You Hear: Tactile Feedback for Navigation of Audio Graphs**
S. Wall, S. Brewster, *University of Glasgow*
- 1133 Remote Usability Evaluations with Disabled People**
H. Petrie, *University of York*
F. Hamilton, N. King, P. Pavan, *Designed for All Ltd*
- 1143 Desperately Seeking Simplicity: How Young Adults with Cognitive Disabilities and Their Families Adopt Assistive Technologies**
 M. Dawe, *University of Colorado*

Beliefs and Affect

Chair's Welcome

Welcome to CHI 2006! CHI is the leading international conference on human-computer interaction (HCI). It provides an opportunity to interact with your colleagues, to inform each other about the latest results and methods in the HCI field, and to inspire each other to move the field forward. CHI takes on some new forms this year. We have expanded the technical program to four days, in large part due to the growth of activity in the many areas of HCI. We have made courses part of the regular technical program and have included them in the registration fee.

This year we have made an explicit effort to engage the many communities that make up the CHI field. The goal has been to ensure that the conference program contains events that will appeal to all communities. Of course, many events are cross-cutting, appealing to multiple communities.

- Design – Design processes for creating user experiences; user interface innovations.
- Education – Advancing HCI education at all levels.
- Engineering – Organizing the design and construction of interactive artifacts to achieve desired outcomes.
- Management – The business and organizational sides of HCI.
- Research – Scientifically advancing the state of the field in all areas.
- Usability – Methods, tools, and strategies to improve the user experience of products and services.

The CHI 2006 conference is being held at the Palais des Congrès (convention center) in the heart of Montréal. This facility is within walking distance of many attractions. The conference hotels are all clustered near the Palais. Montréal is a wonderful, cosmopolitan city, an interesting mix of European and North American influences.

We hope you enjoy this year's conference.

Gary Olson
Conference Chair

Robin Jeffries
Technical Program Chair

CHI 2006 Papers & Notes Co-Chair's Message

Welcome to the CHI 2006 proceedings. We believe the research papers you will find here represent the latest and most significant work in the diverse and dynamic field of human-computer interaction (HCI).

As a leading conference in the field, creating a CHI research papers program requires a tremendous amount of effort and time from the research community. Many of you have contributed as authors, reviewers, or as volunteers supporting the papers process. We thank all of you for the dedication and seriousness with which you undertook this work. For each of the 674 submissions – 508 full papers and 168 CHI Notes – received this year, thousands of words of reviews, discussion among reviewers, and meta-reviews were written. During the review process 1183 reviewers generated well over 3300 reviews providing feedback to authors whether their papers were accepted or not. We are particularly indebted to the papers and notes program committee members, also known as the Associate Chairs (ACs). Balancing areas of expertise and geography, ACs are selected from the field's leading researchers, and in some special cases senior practitioners responsible for the user experience of major products. ACs were responsible for recruiting all reviewers, moderating and supervising the review process to ensure a high-quality set of reviews was obtained, initiating and organizing author rebuttal and reviewer discussions, shepherding revisions for papers needing extra attention, and approving final submissions. Full papers ACs met in Atlanta in December, 2005 largely at their own expense and from all around the world for two intense days of review, debates, and deliberation. The expected time expenditure to serve as a full papers AC was 14 days of full-time work, and many committee members' efforts far exceeded those estimates. The committee was extremely serious and careful in making CHI paper decisions, with many papers receiving multiple discussions throughout the meeting. While no review process can execute perfectly in every case, we believe this year's process took several steps in the right direction to improve the consistency and quality of CHI reviews and the resulting papers. This year's program committee certainly has our everlasting gratitude and deserves the sincere appreciation of the entire HCI community.

New for 2006, CHI Notes are modeled on the successful UIST TechNotes and CSCW Notes categories of research papers. CHI Notes are similar in many respects to the full papers found in these proceedings, but CHI Notes are briefer and more focused (4 pages instead of 10). The goal is to increase the diversity of the fully-reviewed technical program by presenting submissions that might not fit well within the traditional research papers program. As with full papers at CHI 2006, we believe the notes you will find here represent the latest and most significant work in the diverse and dynamic field of human-computer interaction.

In many respects CHI Notes are similar to full papers. First and foremost, CHI Notes were designed to be reviewed to the same exacting standards as full papers; the submission and review process for CHI Notes was almost identical to the system in place for full papers. Both full papers and CHI Notes are self-contained contributions to the research program, and they must contain clear statements of the significance of the work and the contribution relative to related work. However, CHI Notes are different from full papers. CHI Notes are much more focused and succinct contributions with a maximum length of 4 pages. As such, they typically have a smaller scope of contribution and do not necessarily have all the traditional elements of a full paper submission (but they may go into depth in specific areas). Also, CHI Notes are not expected to discuss related work to the same breadth or level of completeness of a full paper. This year, we accepted 33 of our 168 CHI Note submissions. While the authors, reviewers and ACs may have been challenged by the lack of precedent for what makes a great CHI Note, we are very pleased by our program. We think you will be, too.

CHI is both a journal-quality archival forum and a community-building conference. In selecting this year's research papers we emphasized "contribution and substance" throughout the process — from the Call for Submissions to reviewer instructions to the program committee meeting. Focusing on contribution is critical to the vitality of our field. To encourage quality in the written presentation of accepted work, all of the 118 full paper acceptances were initially provisional. As a result, authors actively responded and incorporated feedback from the reviews into the final versions of the papers that appear here. We believe that effectively treating the CHI paper review process more like a journal review while remaining within the constraints of a conference timeline has had a salutary effect on the quality of the final papers. We hope you will agree.

Finally, the SIGCHI "Best of CHI" program resulted in 29 of the accepted full papers and notes that were deemed to make an especially noteworthy contribution to human-computer interaction research being designated by the program committee as nominees for Best of CHI Awards. An awards committee, chaired by Jim Miller, selected three to receive the label SIGCHI Best Paper. The Best Paper awardees are called out in the table of contents with a wreath icon; the remaining nominees are shown with a quill icon. While all papers accepted into the CHI research papers program are the result of a rigorous review process, the Best of CHI Awards give our community a welcome mechanism for collectively taking notice of particularly outstanding contributions in each year.

We hope you will enjoy the research papers program at *CHI 2006* and will find the work reported herein inspiring, challenging, and of lasting value.

Rebecca E. Grinter and Tom Rodden
CHI 2006 Papers Co-Chairs

Paul Aoki and Edward Cutrell
CHI 2006 CHI Notes Co-Chairs

From ACM SIGCHI's President and Vice President for Conferences

Welcome to CHI 2006! SIGCHI is proud to sponsor the premier annual conference in the field of human-computer interaction. Many notable events and advances in HCI have taken place at past CHI conferences, and this year is no exception. We are also extremely grateful to Gary Olson, the CHI 2006 Conference Chair, and his entire committee for putting together such an impressive program and experience. We particularly appreciate their efforts to make it possible to extend CHI 2006 to a four-day technical program; to add a new job fair, CHI notes, and other venues; and to make CHI's courses more accessible to attendees.

The CHI conference, sponsored by ACM's Special Interest Group on Computer-Human Interaction (SIGCHI), is an ideal forum for people to meet, both formally and informally, to exchange views, to share experiences, and to learn. This conference brings together professionals from research and practice; people from industry, academia, and government; long-time veterans of HCI and newly emerging students and professionals; all in an environment designed to encourage interaction. We invite you to take an active part in that interaction--introduce yourself to people, interact with presenters and speakers, renew old friendships or make new ones.

SIGCHI is an international group of professionals who share an interest in the many diverse facets of HCI. SIGCHI is committed both to advancing the field of HCI and to facilitating exchange of information within the SIGCHI community. While the CHI conference is the single most visible activity of SIGCHI, we also sponsor and support a wide range of more specialized conferences in areas ranging from interactive system design to user interface technology to computer-supported cooperative work to user interfaces imbued with artificial intelligence. Please consult the SIGCHI conference schedule, or visit our website at <http://www.sigchi.org/> for more information.

SIGCHI and ACM also produce some of the most highly respected publications in the field. All members receive *interactions*, a highly-acclaimed magazine covering the broad field of HCI and user interface design. *ACM Transactions on Computer-Human Interaction*, now in its 12th year, is our flagship journal--a quarterly publication with the top-quality archival research aimed at researchers and those translating research into practice. To help members keep up in these fast-paced times, we also publish an on-line newsletter--*SIGCHI Bulletin*--with information about SIGCHI's activities and news in the field.

SIGCHI is truly an international organization, with 65 chapters in 30 countries on six continents. We encourage all SIGCHI members to join their local chapter - or if there isn't one in your area, we would love to help you create one. And don't forget virtual communities! SIGCHI hosts dozens of electronic mailing lists on topics ranging from HCI and the Web, to HCI education, to public policy and beyond. These lists range from dozens of subscribers to thousands, and are an excellent way to keep up with the field and with friends.

Finally, on behalf of ACM SIGCHI, we again want to thank the conference committee and all of the hundreds of volunteers who make this conference possible. Their work makes this a rewarding experience for each of us.

Joseph A. Konstan
SIGCHI President

Dennis Wixon
SIGCHI Vice-President for Conferences

About SIGCHI and ACM

CHI 2006 is sponsored by ACM's Special Interest Group on Computer-Human Interaction (ACM SIGCHI). The scope of SIGCHI consists of the study of the human-computer interaction processes and includes research, design, development, and evaluation efforts for interactive computer systems. The focus of SIGCHI is on how people communicate and interact with a broadly-defined range of computer systems. SIGCHI serves as a forum for the exchange of ideas among computer scientists, human factors scientists, psychologists, social scientists, system designers, and end users. Nearly 5,000 professional members of the SIGCHI community work together toward common goals and objectives.

ACM, the Association for Computing Machinery (www.acm.org), is committed to advancing computing as a science and as a profession. ACM serves as an umbrella organization offering its 80,000 members a variety of forums in order to fulfill its members' needs — the delivery of cutting-edge technical information, the transfer of ideas from theory to practice, and opportunities for information exchange. Providing high quality products and services — world-class journals and magazines; dynamic special interest groups; numerous “main event” conferences; tutorials; workshops; local special interest groups and chapters; and electronic forums - ACM is the resource for lifelong learning in the rapidly changing IT field.
